WHY COMPRESSION?

Every muscle cell needs energy in the form of oxygen. This is transported to the muscles via the blood. The better the blood flow in the arteries, the better the muscles are supplied – and precisely this supply can be positively influenced by compression.

But, not all types of compression are the same.

CEP – THE INTELLIGENT SPORTSWEAR?

In order to benefit from compression, many factors must be satisfied. The latest scientific studies show that the key to increased blood flow and improved oxygen supply to the muscles is a specific, physiologically correct pressure profile and the resultant compressive strength.

CEP compression sportswear contains one-of-a-kind compression know-how: six decades of research and development on the effects of compression flow into every CEP product. This advanced stitching technology "made by medi", the specialists in medical compression, allows the compression thread to be precisely incorporated into the circular knitted material.

The result:

a physiologically perfect pressure profile for greater performance, longer endurance and faster regeneration.

Regardless of whether before, during or after exercise – CEP is the perfect partner!

ADDITUS⁺
SYSTEM
INSIDE

ADDITUS⁺ SYSTEM

medi compression is synonymous with innovation, technology and expertise in medicine and sport. Our competence dates back to 1951.

The ADDITUS⁺ System combines compression and functionality. Individually for each type of sport.

RECOVERING⁺
SYSTEM
INSIDE

RECOVERING⁺ SYSTEM

medi compression is synonymous with innovation, technology and expertise in medicine and sport. Our competence dates back to 1951.

The RECOVERING⁺ System guarantees optimum physical comfort and the fastest possible regeneration before and after sport.

BUT COMPRESSION ALONE DOES NOT RESULT IN OPTIMUM PRODUCTS FOR ATHLETES.

With the ADDITUS⁺ system, CEP products offer the best combination of compression and specific functions for every sport type.

Thus the products provide maximum impact and maximum comfort – no matter what sort of exercise.

In addition, the RECOVERING⁺ system was developed for optimum regeneration before and after exercise.

This ensures absolute comfort and the fastest possible recovery between matches and training sessions.

The highest standards of quality "made in Germany", "Öko-Tex Standard 100" certification and the scientifically tested performance complete the profile of CEP products and make them uncompromisingly unique and capable of being experienced.

Convince yourself of the uniqueness of the brand and its products!

THE BENEFITS OF CEP COMPRESSION SPORTSWEAR!

IMPROVED BLOOD CIRCULATION /
MORE OXYGEN / MORE ENERGY /
MORE STAMINA / MORE PERFORMANCE /
FASTER REGENERATION /
MUSCLE AND JOINT STABILIZATION /
PREVENTATIVE FUNCTION

ADDITUS⁺

INSIDE

COMPRESSION SPORTSWEAR

THE SUCCESS STORY OF SPORTS-RELATED COMPRESSION CONTINUES:
FOR THE FIRST TIME, INCREASING THE OXYGEN SUPPLY IS NOW ALSO POSSIBLE FOR THE THIGHS.

With the "running compression shorts", the "triathlon compression shorts" and the "triathlon compression skinsuit", CEP lives up to its reputation as a hotbed of innovation.

Thanks to the integrated elastic compression thread, a continuous arterial counter pressure is exerted on the working muscles. This special thread winds about 200 times around the thigh to be able to ensure the optimum pressure for an extra supply of oxygen.

In the same manner as sport socks, the elastic material and the three-dimensional manufacturing process "made by medi" ensure a proper fit and maximum freedom of movement.

The result:

Performance can be measurably increased, cramps can be minimized, and you can stay fit for longer.

TIMO BRACHT

"You can feel the power in your thighs with every pace you run. What's more the muscle pain you get when running downhill is noticeably reduced. You really feel the regenerating effect over long distances. The tights and the socks are top notch quality products. They make a significant contribution to the speed of my running."

MEN / WOMEN

RUNNING COMPRESSION SOCKS

- MORE ENERGY, STAMINA AND PERFORMANCE
- IMPROVED BLOOD CIRCULATION
- PREVENTATIVE FUNCTION
- MUSCLE AND JOINT STABILIZATION
- IMPROVED COORDINATION

FEATURES

Graduated medi compression, air channels, achilles tendon protector, anatomic foot padding, comfortable band, extra-flat toe seam, odour-reducing silver ions, anatomical fit, microfiber technology, breathable, moisture management

TARGET GROUP

Runners, triathletes and endurance athletes

COLOUR

available in: white, black, pink, green
progressive look available in: white, black

MATERIAL

85% polyamid, 15% spandex

COMPRESSION SPORTSOCKS SIZE CHART

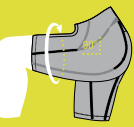

Please measure your calf circumference at the widest point and select the appropriate size from the chart.

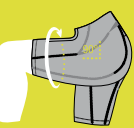

MASSTABELLE MÄNNER	GRÖSSE WADENUMFANG	III 32 - 38 CM	IV 39 - 44 CM	V 45 - 50 CM	Messen Sie den Umfang an der stärksten Stelle Ihrer Wade.	
SIZE CHART MEN	SIZE CALF CIRCUMFERENCE	III 12,5 - 15 IN	IV 15,5 - 17,5 IN	V 18 - 20 IN	Measure your calf circumference at the widest point.	

MASSTABELLE FRAUEN	GRÖSSE WADENUMFANG	II 25 - 31 CM	III 32 - 38 CM	IV 39 - 44 CM	Messen Sie den Umfang an der stärksten Stelle Ihrer Wade.	
SIZE CHART WOMEN	SIZE CALF CIRCUMFERENCE	II 9,5 - 12 IN	III 12,5 - 15 IN	IV 15,5 - 17,5 IN	Measure your calf circumference at the widest point.	

COMPRESSION SHORTS/SKINSUIT SIZE CHART

Please measure your mid-thigh circumference. If the measurement is between two sizes, use your normal clothing size as a guide.

MASSTABELLE MÄNNER	GRÖSSE OBERSCHENKELUMFANG RICHTGRÖSSE	II 45 - 55 CM S	III 50 - 60 CM M	IV 55 - 65 CM L	V 60 - 70 CM XL	VI 60 - 75 CM XXL	Messen Sie den Umfang an der Oberschenkelmitte.	
SIZE CHART MEN	SIZE THIGH CIRCUMFERENCE ESTIMATED SIZE	II 18 - 22 IN S	III 20 - 24 IN M	IV 22 - 26 IN L	V 24 - 28 IN XL	VI 24 - 30 IN XXL	Measure your mid-thigh circumference.	

MASSTABELLE FRAUEN	GRÖSSE OBERSCHENKELUMFANG RICHTGRÖSSE	I 40 - 50 CM XS	II 45 - 55 CM S	III 50 - 60 CM M	IV 55 - 65 CM L	V 60 - 70 CM XL	Messen Sie den Umfang an der Oberschenkelmitte.	
SIZE CHART WOMEN	SIZE THIGH CIRCUMFERENCE ESTIMATED SIZE	I 16 - 20 IN XS	II 18 - 22 IN S	III 20 - 24 IN M	IV 22 - 26 IN L	V 24 - 28 IN XL	Measure your mid-thigh circumference.	

WASHING INSTRUCTIONS

The CEP compression sportsocks require careful washing to protect the fibers and preserve the performance-enhancing effect and in-wear-comfort. Please note:

- WASH THE CEP COMPRESSION SOCKS AND SPORTSWEAR AFTER USE
- WASH IN MACHINE, DELICATES CYCLE, 40°C
- DO NOT USE BLEACH
- MAY BE DRIED AT A LOW TEMPERATURE IN THE TUMBLE DRYER
- NEVER ALLOW TO DRY IN DIRECT SUNLIGHT OR ON A RADIATOR
- DO NOT IRON
- DO NOT DRY-CLEAN

COMPRESSION SPORTSOCKS

COMPRESSION SPORTSWEAR

CEP recommends the use of mild detergent when washing garments.

WHO WE ARE?

The CEP brand stands for a high performance compression sportswear designed by medi.

CEP compression sportswear is the result of six decades of compression expertise. medi has specialized in medical compression since 1951.

medi is a second-generation family-run business. As a market leader medi is represented in 125 countries around the globe. The company employs 1.340 staff, 940 of the at its head office and production in Bayreuth - Made in Germany.
